## Agenda

- 1) Inversion count (xx)
- 2) rustom comparison Lort on the basis of no. of factors etc.
- 3) Largest number
- an inversion if ieg but A[i] > A[j].

custom comparison

int [] A = {2,3,0,1,73; Arrays.sort(A); A win get sorted in inc. order

values of element

0.2 hiven an int[]A, arrange values in A to Jorn Jargest number.

$$A[7 \Rightarrow 3 30 34 5 9 \Rightarrow 9534330$$
 $A[7 \Rightarrow 2 3 9 0 \Rightarrow 9320$ 

String largest\_no (int[]A) ?
